

Single section clear-varnished beech wall bar with oval rungs. One of the two upper rungs is placed inwards while the other outwards to carry out suspension exercises. With zinc-plated steel joints to fix the wall bar to the wall. The wall bar is useful in carrying out joint and muscular exercises, in particular preventive and therapeutic exercises against backache. Other uses of the wall bar are rehabilitation and workout, joint stretching, and exercises to correct bad posture and joint movement exercises in children.
